THE SINGULAR SOLUTION TO DESKTOP MASTERING

ALL IN ONE

ALL AT ONCE

Mixing and mastering required *Dedicated Space, Dozens of Components* and *Constant Engineering maintenance.*

Any-space, Anywhere, Anytime

The PX150 comprises a complete Audio Production Ecosystem. It merges the sophistication and convenience of a world class Audio Control Room and a high speed low jitter connection to the DAW and PC family of your choice, *using only one cable*.

The Best Quality Sound From Any Media Device

The S150 Satellite Pair employs the same proven, patented anti-comb filtering and self-diffusion technologies that make the rest the Phasx PX line so effective in commercial media authoring. Because of its extremely small size, the S150 is even more effective at presenting a deep and highly defined stereo field in a Personal Listening Space™ that is surprisingly immune to room acoustics, and delivers much more detail and precision than even the best headphones can.

All the benefits of a full blown A/V Authoring System right on your desktop.

150 APPs

S150

ADIO 150

We designed the PX150 System to seriously reduce the need for Engineering attention in a home studio or mobile environment. The 150 APPs make switching, routing, and monitor control simple enough for any newcomer to master. They provide Real Time Control and Metering for the PX150's ultra sophisticated DSP hardware which does the actual Audio Processing. They Provide the user CONFIDENCE in every part of the signal path displaying status, level, and clipping/limiting information. All of which means the APPs save you time, eliminate uncertainty, and above all reduce Engineering Pain to almost zero.

The ADIO150-Bass combines quality bass to nearly 30Hz with a comprehensive computer audio interface bolstered by the proprietary Phasx DSP suite. Equally at home in Reviewing, Mixing, Remixing, and Mastering, the ADIO150-Bass uses the same Analog Devices DSP, XMOS USB, and Cirrus Logic converters as the rest of the Phasx line, so sound quality is always impeccable! Inputs from USB, S/PDIF, Analog, and AAC Bluetooth are all supported. Wireless APP control is also available with a free download for your iPad, which adds studio grade features such as 4X4 routing and room EQ. At the price of the PX150, there is nothing in the industry to match it!

The PX150 System is compatible with nearly any Media-Capable Smart device that includes USB2 compatibiity. Desktops, Laptops, Smart Phones, Tablets, Phablets, and more. With Bluetooth AAC compatibility, which makes Bluetooth usable as a source pipe, it will even work with a Watch!

Quality Stereo Line Input Allows For Traditional Sources

What Will Your Mix Really Sound Like In The Club?

The PX150 can reach downto 31Hz without a Subwoofer! It runs at up to 100dBspl average with peaks to 110dBspl. That makes it the Loudest, Lowest, and Cleanest Desktop Authoring System available today, and the *only* one that can realistically simulate professional club sound!

Performance You Can trust

The Shadocaster™ Line from Phasx redefines the meaning of Audio Monitoring. Phasx Systems produce World Class Results never possible on a desktop before. You'll be astonished at the new creative insights and workflow efficiancies that you could never experience outside of a top end Studio Control Room. Wether you're a first year media student, an emerging artist, or a seasoned producer, there is a Phasx System that will revolutionize the way you work and the place you work in.
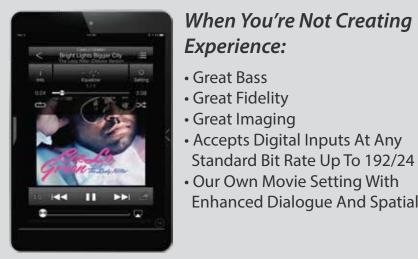

Room Immune Shadocaster Acoustics

Bass Down To 31 Hz Right On Your Desktop

The Phasx PX150 Audio Production Suite Is Revolutionizing The Way We Create, Listen To, And Share Music. It's Unprecedented Level Of Integration Makes It The Best Value In The Industry!

Phasx PX150
Your Personal Listening Space™

When You're Not Creating Experience:

• Great Bass
• Great Fidelity
• Great Imaging
• Accepts Digital Inputs At Any Standard Bit Rate Up To 192/24
• Our Own Movie Setting With Enhanced Dialogue And Spatiality
